Dog Day Afternoon Spa uses Happytails dog spa products. We have solutions to all of your worst canine quandaries; a wide range of all natural shampoos, sprays and eco-friendly dog products that solve common problems. From bad breath and gas to tear stain removal. From dry, itchy or allergic skin to calming a nervous anxious or overactive dog. Happytails products are all cruelty free and use only better than human quality ingredients which make them safe, gentle and highly effective.

## Product Profile & User References

When you're entirely covered with hair, a bad hair day is no laughing matter. But with all that hair it's hard to get to the root of the problem; the roots. Bubbles 'n Beads has the solution: Our all-natural shampoo contains exclusive micro-beads packed with conditioning vitamins. They penetrate the coat, burst against the skin, delivering their nutrients right where they're needed; at the follicle. The result is a healthier, shinier more lustrous coat.

Bubbles 'n Beads contains anti-microbial tea tree oil to clean and combat infections, 14 amino acids to repair a dull coat, and a wonderful scent of "clean laundry" to ensure that your best friend smells wonderful long after bathing.

### Bubbles 'n Beads features:

- Time-saving 2 in 1 shampoo and conditioner
- Micro-beads deliver vitamins and conditioners to the skin
- Blend of 14 Amino Acids:
  1. improves coat strength and shine
  2. makes the coat noticeably softer to the touch
  3. replenishes cells to heal skin damage
- Rain Forest remedies help reduce flaking and skin irritation.
- Canadian Willowherb, a potent anti-inflammatory,

Bubbles 'n Beads contains no SLS or Parabens, uses a coconut based surfactant...and of course, is cruelty free.

*No statement in this publication has been evaluated by the Food and Drug Administration. No Happytail product is intended to diagnose, cure, treat, or prevent any disease.*

Ordinary shampoos and conditioners only clean the coat, most of the healing ingredients are rinsed away before contacting the skin. Bubbles n' Beads cleans and conditions but this all-natural shampoo contains exclusive micro-beads packed with conditioning vitamins. They penetrate even the thickest coat, burst against the skin and deliver nutrients right where they're needed; to the follicle. The result is healthier, stronger, more lustrous hair, and the reduction of itching and flaking.

## Completely Amazed

You recently sent me a sample of the Bubbles & Beads shampoo. I just started my own gift basket business and was interested in your products. I finally got around to using the shampoo on my two girls yesterday and was completely amazed! Their fur is sooooo soft and I was able to bathe a lab and a corgi mix with the sample bottle. I made a purchase just now and am excited to share your products and to try more for us!

## OMG!

by DogTime blogger | Secret Shopper Blog

Baths are baths, the experience is never quite fun. Although this was the first time I've ever used a product with beads in it. I don't know what the beads do, but it was interesting to watch them dissolve. The pamphlet says they are "microencapsulated conditioner" which is pretty fancy. So, the bath is not fun, but the results are. They should have called Bubbles 'N Beads the "Fluffinator"! OMG! after Champ dried off, he was a gigantic cute and fluffy monster. He certainly was clean and his hair very soft. One thing I liked was that the shampoo did not have an overwhelming perfume as so many of them do.

My one regret was that I did not have a bottle of Happytails' Shimmering Mist to give his bath that extra glimmer.

## Bye bye dry flaky skin

I always test all products before I sell them just to see how well they work. I was bathing my dog back in the self wash with one of your samples of Bubbles n Beads when one of my customers noticed the suds and fresh clean smell coming from my tub. She immediately wanted me to go grab a bottle off of my shelf for herself.

We were both washing at the same time and by the end we were so amazed at how wonderful both of our dogs smelled (actually all 3 of them). I ALWAYS use a conditioner on my dog Sylar and this time I didn't have to. I could feel how soft and clean he was just after shampooing.

I gave it a few days just to see if Sylar would get his usual dry flaky skin and guess what? It never came back. I normally bathe every 1-2 weeks but with Bubbles n Beads I was able to wait a month and still have a fresh smelling dog.

When my customers come in using it in the back I love the way it makes the whole room smell fresh and everyone always wonders what the person next to them is using!

## 2 in 1 Shampoo Conditioner

Dog Grooming Review -

A Merryvaluation from Pampered Puppy.com

by Angie McKaig

**PRODUCT REVIEW**

Once you leave behind the cheapo pet "big box" grooming supplies for your pet and start stepping into the world of upscale and/or natural coat care products for dogs, it's a whole new world, baby. And a confusing one. If you think "all natural" is a hard word to define in the world of human food, just try it with pet grooming unguents and see how far you get.

It's one of the reasons I've always liked and respected happytails™ - because they not just believe in but insist on transparency with the customer. The information they make available about their products - what goes into them, and more importantly why those ingredients are used - is among the most comprehensive in the entire industry.

I'm all about transparency. How am I supposed to make an informed choice if I don't understand?

This is never more true than with their newest product, Bubbles'n Beads.

Bubbles'n Beads is the company's first (I believe) 2-in-1 product, combining shampoo and conditioner in a single bottle. But it's much more than that.

The secret, or part of it anyway, is in the little blue and white bubbles: microbeads. They contain conditioning vitamins and are designed to burst up against the skin and roots, and to really penetrate tough coats.

The rest of the formula is incredible: a powerhouse of 14 amino acids (to improve shine, softness and heal skini damage), Jesuit's Balsam and Brazil Nut extract (to reduce flaking and irritation), Canadian Willowherb (an anti-inflammatory and antioxidant) and three tea tree oils (to reduce itching and redness).

The company makes a one-page info sheet available on their web site about the product which includes a full list of all the ingredients as well as their purpose (it's a bigger list than we can provide here). Highly recommended particularly for the side-by-side feature comparison of their three main shampoo products and where Bubbles'n Beads fits in. Makes life much easier for the pet owner trying to decide which one is bets.

The scent is really interesting. The company calls it "Clean Laundry" and it's definitely got that soft, springtime scent to it. But it's not overpowering at all - you really have to sniff the fur closely to smell it once the pooch is dry again. (Nobody likes an overpowering scent - least of all, your pooch.)

It wasn't a hugely frothy lather though it was more than enough to get the princess clean, and it rinsed very clean - one of my sticking points. And the princess's coat felt gorgeously soft afterwards.

I have to say, though, my favorite part was the 2-in-1 part. The beads looked cool, but it was really convenient to only have to go through one product while dealing with a wet pooch, rather than having to go through two separate steps for cleaning and conditioning.

Bubbles'n Beads has definitely made a place for itself on the side of our tub. You should check it out.

You can find out more about happytails™ from their web site at [www.happytailsspa.com](http://www.happytailsspa.com). Tell them Merry sent you!

**What can we say but WOW.**

**We love your products.**

**We get free samples of other products all the time. In the last month we got some that are suppose to be breed-specific. We groomed Lillie with the new products, and Sadie with yours. The difference was so dramatic. Lillie's coat was dry & stripped, and Sadie's was soft, moist & huggable!**
