Dog Day Afternoon Spa uses Happytails dog spa products. We have solutions to all of your worst canine quandaries; a wide range of all natural shampoos, sprays and eco-friendly dog products that solve common problems. From bad breath and gas to tear stain removal. From dry, itchy or allergic skin to calming a nervous anxious or overactive dog. Happytails products are all cruelty free and use only better than human quality ingredients which make them safe, gentle and highly effective.

## Product Profile & User References

Whether it's time for bed or just timeout, this relaxing tonic will calm a nervous dog. Soon he'll be ready for a restful night's sleep, an afternoon of drowsy napping or simply ready to give you a well-deserved break.

This concentrated elixir was formulated exclusively for happytails by Robert McDowell, the world's leading authority on applying western herbal medicines to canine health problems. The formulations combine herbs and homeopathic medicines so that the metabolic and nervous system imbalances are all addressed together." Says Mc Dowell, "The herbal mixes are not toxic in any way, are free from side effects and are simple and safe to administer at home".

### Sleepytime Tonic

- Put a couple of drops on a treat, in his mouth or in his water
- Will work in about 20 minutes to calm your anxious dog
- Use consistently to help to rebalance him to be calmer
- Perfect for travel, trips to the vet, fireworks or anxiety
- Bach Flower based remedy that is safe and effective

### How it works

Sleepy Time Tonic works to nourish the physical nervous system and assists in retraining efforts to break habits like barking, cowering or aggression. Also is useful during thunderstorms and while traveling

Robert McDowell is the worlds leading authority on applying Western herbal medicines to canine health problems and formulated these herbal elixirs exclusively for Happytails.

He has a unique understanding of the underlying causes of health conditions, which allows him to heal by treating the causes rather than by simply alleviating symptoms with drugs. Robert is from New Zealand and has lived and worked in North and South America, Europe and in Asia and he now operates from a small country town in Australia.

Through his articles and lectures and his free web-based consulting services, he deals with dog owners all around the world. He has a large range of standard preparations covering the most common canine health complaints and formulates specific remedies on a case by case basis upon request. ### Thunderstorms

I received my sleepytime in the mail and I have had a chance to try it out.

My Bullmastiff, Ocean, is greatly afraid of thunderstorms and I worry about her having a heart attack. She starts panting and shaking so much, I'm scared. I sprayed the sleepytime in her mouth, and it made quite a difference. She is still scared, but not half as bad as before.

I really think this can work for her.

Thank You So Much  
Dianna Nida

### I love this product and would recommend it to everyone

I have been a fan of flower essences for myself for years and when I saw that the tonic was essentially that, I gave it a try and I'm so glad I did. I didn't want something that would make my dog groggy and sleepy so I was a bit skeptical at first but this was not the case, my dog loves the sleepy tonic, I don't even have to force her, I put it in her water and sometimes I squirt it directly into her mouth.

What I like about it most is that it is effective fairly quickly and it just takes the edge off, it doesn't make her sleepy or groggy. My Giant Schnauzer has a lot of energy and personality so, I use this product whenever I'm taking her to get groomed, on long trips and sometimes when I take her to the vet, but I especially give it to her whenever I'm having a party or whenever people are coming over because it just calms her down a little without taking away her spunky personality like other products do.

I love this product and would recommend it to everyone with a large breed overly excited dog, it really works!

**I would HIGHLY recommend this product**

My 2 Yorkies would get upset when traveling by car-- long or short distances-- and sometimes during bad weather, especially if they "sensed" it from me! I also will give them a bit when lots of people are coming over to make them calmer also. At bedtime I give them 1 little drop, which they eagerly take, and it makes them drowsy within a few minutes so they don't move around so much and disrupt MY sleep in the bed. We ALL wake up feeling refreshed after a good night's rest!

I just got back from taking them on a 250 mile road trip one way and gave them each 1 drop before leaving and they settled down after a few minutes in the car and were GREAT the whole way down with NO upset tummies or worries!

I would HIGHLY recommend this product to anyone who suffers with an "anxious, stressed" dog who just needs to "chill out" a bit. And since it's ALL natural, and not a medication like they give at the vets, I don't worry about any residual affects on their systems!

Thanks Happytails, as you can see in the picture, we are a "Happy Family" and will be ordering from you again!

Sincerely,  
Rebecca Whitley  
North Carolina

**I saw immediate results!**

I came across your Sleepytime Tonic product while browsing vendors at a local all breed show. I had a young English Springer Spaniel puppy dog that was less than confident and quite sound sensitive. He would clamp his tail at the slightest sound and was always looking for something to scare him. As a show prospect, this puppy needed to show confidence and attitude in the ring. The vendors discussed the positive results they had experienced with their own dog using Sleepytime Tonic, and on impulse, I purchased it to use that weekend.

I saw immediate results! Even though the name of the product indicates that this might have a sedative effect, what I experienced was just "taking the edge off" the anxiety. Enough so that he shows himself with confidence in the ring and is easily distracted from "scary" things now. This hasn't changed his basic makeup, but has provided just enough of a calming effect to allow me to get to the ring without wondering if he'll bolt at the slightest noise or crawl around the ring if the loud speaker comes on! I have offered this product to my friends who have anxious dogs, and they have experienced the same results as I have. We are quite thrilled with Sleepytime Tonic and will always keep it in our tack boxes!

**Natural Honey Flavor** added for flavor and sweetness.

**Vegetable Glycerin** used as an all natural herb extractor and preservative

### Doggie Prozac?

A new product that we love here at Hyde Bark Fashions is Sleepytime Tonic. It is an all-natural herbal elixir in a 1 ounce spray that helps to calm anxious or nervous dogs. It retails for \$12.

Happytails manufactures the product and says that dogs will go "from wired to tired in under an hour." I have to tell you that I was skeptical. I ordered the product & gave a bottle to the most unruly dog the shop.

My customer, the dog's owner, called the next day & said that the Sleepytime was amazing! She referred to it at "Doggie Prozac." In any event, it has sold great, and my customers swear by it.

Cynthia Waldenmaier

**USER REFERENCE**

### A Long Term Program Plan To A Dog's Overactive Personality

\* Start by giving your dog Sleepy Time Tonic twice per day.

\* Two weeks after starting the elixirs, hire an experienced dog trainer who uses natural training methods. Retraining your dog to react differently in stressful situations will break the habit and is much simpler when accompanied by a habit breaking homeopathic remedy like Sleepy Time Tonic.

\* Just a few weeks of professional training (which you then continue with your dog), coupled with herbal

elixirs given for 3 or 4 months, should be sufficient to break the nervous habit reactions, leaving the dog and your whole household much more relaxed and calm.

\* As the dog's personality changes, you may reduce the dose to once per day.

#### INSTRUCTIONS

Shake well before using. Add a few drops to a treat or, if he'll let you, directly into his mouth

Dosage:

Small 1 to 2 drops  
Medium 3 to 4 drops  
Large 5 to 6 drops
